

Content of Activate Windows Offline.vbs (Site 1)

' Description: Uses the offline method to activate Windows. Requires a valid activation number.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\\" & strComputer & "\root\cimv2")

Set colWindowsProducts = objWMIService.ExecQuery _
    ("Select * from Win32_WindowsProductActivation")

For Each objWindowsProduct in colWindowsProducts
    objWindowsProduct.ActivateOffline("1234-1234")
Next
```
