

Content of Add 1000 Sample Users to a Security Group.vbs (Site 1)

' Description: Demonstration script that creates a security group named Group1, and adds one thousand users (UserNo1 through UserNo10000) to that group. This script is not intended for use in a production environment.

```
Const ADS_PROPERTY_APPEND = 3

Set objRootDSE = GetObject("LDAP://rootDSE")
Set objContainer = GetObject("LDAP://cn=Users," & _
    objRootDSE.Get("defaultNamingContext"))
Set objGroup = objContainer.Create("Group", "cn=Group1")
objGroup.Put "sAMAccountName", "Group1"
objGroup.SetInfo

For i = 1 To 1000
    strDN = ",cn=Users," & objRootDSE.defaultNamingContext
    objGroup.PutEx ADS_PROPERTY_APPEND, "member", _
        Array("cn=UserNo" & i & strDN)
    objGroup.SetInfo
Next
WScript.Echo "Group1 created and 1000 Users added to the group."
```
