

Content of Add a Template to the Windows Explorer New Menu.vbs (Site 1)

' Description: Demonstrates how to add VBScript Script File to the New context menu in Windows Explorer. Requires a script template named Template.vbs to be in the (Windows\System32\ShellExt folder (on Windows XP))

```
Set objShell = WScript.CreateObject("WScript.Shell")  
objShell.RegWrite "HKCR\VBScript\ShellNew\FileName", "template.vbs"
```
