

## Content of Add an Application to the Standard Profile.vbs ( Site 1 )

' Description: Adds Freecell.exe to the list of authorized applications in the Windows Firewall standard profile.

```
Set objFirewall = CreateObject("HNetCfg.FwMgr")
Set objPolicy = objFirewall.LocalPolicy
Set objProfile = objPolicy.GetProfileByType(1)

Set objApplication = CreateObject("HNetCfg.FwAuthorizedApplication")
objApplication.Name = "Free Cell"
objApplication.IPVersion = 2
objApplication.ProcessImageFileName = "c:\windows\system32\freecell.exe"
objApplication.RemoteAddresses = "*"
objApplication.Scope = 0
objApplication.Enabled = True

Set colApplications = objProfile.AuthorizedApplications
colApplications.Add(objApplication)
```
