

## Content of Change a Read-only File to a Read-write File.vbs ( Site 1 )

```
Const ReadOnly = 1
```

```
Set objFSO = CreateObject("Scripting.FileSystemObject")  
Set objFile = objFSO.GetFile("C:\Scripts\Test.vbs")
```

```
If objFile.Attributes AND ReadOnly Then  
    objFile.Attributes = objFile.Attributes XOR ReadOnly  
End If
```
