

Content of Check to See if a User Exists in an NT 4 Domain.vbs (Site 1)

```
Set objDomain = GetObject("WinNT://fabrikam")
objDomain.Filter = Array("User")

blnFound = FALSE

For Each objUser in objDomain
  If objUser.Name = "kenmyer" Then
    blnFound = TRUE
    Exit For
  End If
Next

If blnFound = TRUE Then
  Wscript.Echo "The user account exists in the domain."
Else
  Wscript.Echo "The user account does not exist in the domain."
End If
```
