

Content of Copy a Folder Using WMI.vbs (Site 1)

' Description: Uses WMI to copy the folder C:\Scripts to D:\Archive.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colFolders = objWMIService.ExecQuery( _
    "Select * from Win32_Directory where Name = 'c:\Scripts'")

For Each objFolder in colFolders
    errResults = objFolder.Copy("D:\Archive")
Next
```
