

## Content of Create 1000 Sample User Accounts.vbs ( Site 1 )

' Description: Demonstration script that creates 1,000 user accounts (named UserNo1, UserNo2, UserNo3, etc.) in the Users container in Active Directory. The script is useful for test scenarios that require multiple users.

```
Set objRootDSE = GetObject("LDAP://rootDSE")
```

```
Set objContainer = GetObject("LDAP://cn=Users," & _  
objRootDSE.Get("defaultNamingContext"))
```

```
For i = 1 To 1000
```

```
Set objLeaf = objContainer.Create("User", "cn=UserNo" & i)  
objLeaf.Put "sAMAccountName", "UserNo" & i  
objLeaf.SetInfo
```

```
Next
```

```
WScript.Echo "1000 Users created."
```
