

Content of Create Expanded String Values.vbs (Site 1)

' Description: Uses WMI to create an expanded string value under the HKLM\SOFTWARE\System Admin Scripting Guide portion of the registry.

```
Const HKEY_LOCAL_MACHINE = &H80000002
```

```
strComputer = "."
```

```
Set oReg=GetObject("winmgmts:{impersonationLevel=impersonate}!\\" & _  
strComputer & "\root\default:StdRegProv")
```

```
strKeyPath = "SOFTWARE\System Admin Scripting Guide"
```

```
strValueName = "Expanded String Value Name"
```

```
strValue = "%PATHEXT%"
```

```
oReg.SetExpandedStringValue _  
HKEY_LOCAL_MACHINE,strKeyPath,strValueName,strValue
```
