

## Content of Create String and DWORD Values.vbs ( Site 1 )

' Description: Uses WMI to create string and DWORD values under the HKLM\SOFTWARE\System Admin Scripting Guide portion of the registry.

```
Const HKEY_LOCAL_MACHINE = &H80000002
```

```
strComputer = "."
```

```
Set oReg=GetObject("winmgmts:{impersonationLevel=impersonate}!\\" & _  
strComputer & "\root\default:StdRegProv")
```

```
strKeyPath = "SOFTWARE\System Admin Scripting Guide"
```

```
strValueName = "String Value Name"
```

```
strValue = "string value"
```

```
oReg.SetStringValue HKEY_LOCAL_MACHINE, strKeyPath, strValueName, strValue
```

```
strValueName = "DWORD Value Name"
```

```
dwValue = 82
```

```
oReg.SetDWORDValue HKEY_LOCAL_MACHINE, strKeyPath, strValueName, dwValue
```
