

Content of Create User Accounts Based on Information in a Spreadsheet.vbs (Site 1)

' Description: Demonstration script that creates new Active Directory user accounts based on information stored in an Excel spreadsheet.

```
Set objExcel = CreateObject("Excel.Application")
Set objWorkbook = objExcel.Workbooks.Open _
("C:\Scripts\New_users.xls")

intRow = 2

Do Until objExcel.Cells(intRow,1).Value = ""
  Set objOU = GetObject("ou=Finance, dc=fabrikam, dc=com")
  Set objUser = objOU.Create _
    ("User", "cn=" & objExcel.Cells(intRow, 1).Value)
  objUser.sAMAccountName = objExcel.Cells(intRow, 2).Value
  objUser.GivenName = objExcel.Cells(intRow, 3).Value
  objUser.SN = objExcel.Cells(intRow, 4).Value
  objUser.AccountDisabled = FALSE
  objUser.SetInfo
  intRow = intRow + 1
Loop

objExcel.Quit
```
