

Content of Create a Dfs Node.vbs (Site 1)

' Description: Creates a new Dfs node for a shared folder named Scripts.

```
strComputer = "."  
Set objWMIService = GetObject("winmgmts:"  
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")  
Set objDfsNode = objWMIService.Get("Win32_DfsNode")  
errReturn = objDfsNode.Create  
    ("\\atl-dc-02\Scripts", "\\atl-dc-02", "Scripts", _  
    "New Dfs node for shared scripts.")
```
