

## Content of Create a Primary DNS Zone.vbs ( Site 1 )

' Description: Creates a primary DNS zone named accounting.fabrikam.com on a DNS server.

```
strZoneName = "accounting.fabrikam.com"  
intPrimaryZone = 1
```

```
strComputer = "."  
Set objWMIService = GetObject("winmgmts:"  
    & "(impersonationLevel=impersonate)!\" & strComputer & _  
    \"root\MicrosoftDNS")
```

```
Set objItem = objWMIService.Get("MicrosoftDNS_Zone")  
errResult = objItem.CreateZone(strZoneName, intPrimaryZone)
```
