

## Content of Create a Shadow Copy Storage Area.vbs ( Site 1 )

' Description: Creates a shadow copy storage area -- on drive E -- for storing shadow copies of drive C. This script reserves 130,023,424 bytes of storage space for the shadow copies.

```
Const VOLUME = "C:\"  
Const DIFFERENTIAL_VOLUME = "E:\"  
Const MAXIMUM_SPACE = 130023424
```

```
strComputer = "."  
Set objWMIService = GetObject("winmgmts:"  
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")
```

```
Set objShadowStorage = objWMIService.Get("Win32_ShadowStorage")  
errResult = objShadowStorage.Create(VOLUME, DIFFERENTIAL_VOLUME, MAXIMUM_SPACE)
```
