

## Content of Create a System Restore Point.vbs ( Site 1 )

' Description: Creates a new system restore point on a computer, specifying that the restore point was created prior to installing a new device driver.

```
CONST DEVICE_DRIVER_INSTALL = 10  
CONST BEGIN_SYSTEM_CHANGE = 100
```

```
strComputer = "."  
Set objWMIService = GetObject("winmgmts:"  
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\default")
```

```
Set objItem = objWMIService.Get("SystemRestore")  
errResults = objItem.CreateRestorePoint  
    ("Scripted restore", DEVICE_DRIVER_INSTALL, BEGIN_SYSTEM_CHANGE)
```
