

Content of Delete Multiple Records from a Table.vbs (Site 1)

' Description: Demonstration script that deletes all records from a database where the Department field is equal to Human Resources.

```
Const adOpenStatic = 3  
Const adLockOptimistic = 3
```

```
Set objConnection = CreateObject("ADODB.Connection")  
Set objRecordSet = CreateObject("ADODB.Recordset")
```

```
objConnection.Open _  
    "Provider = Microsoft.Jet.OLEDB.4.0; " & _  
    "Data Source = inventory.mdb"
```

```
objRecordSet.Open "DELETE * FROM GeneralProperties WHERE " & _  
    "Department = 'Human Resources'", _  
    objConnection, adOpenStatic, adLockOptimistic
```

```
objConnection.Close
```
