Content of Delete One Element from a Dictionary.vbs (Site 1)

```vbs
' Description: Demonstration script that deletes a specific key-item pair from a Script Runtime Dictionary. Script must be run on the local computer.

Set objDictionary = CreateObject("Scripting.Dictionary")

objDictionary.Add "Printer 1", "Printing"
objDictionary.Add "Printer 2", "Offline"
objDictionary.Add "Printer 3", "Printing"

colKeys = objDictionary.Keys

Wscript.Echo "First run: "
For Each strKey in colKeys
    Wscript.Echo strKey
Next

objDictionary.Remove("Printer 2")
colKeys = objDictionary.Keys

Wscript.Echo VbCrLf & "Second run: "
For Each strKey in colKeys
    Wscript.Echo strKey
Next
```
