

## Content of Delete Software.vbs ( Site 1 )

' Description: Uninstalls a hypothetical software program (Personnel database) installed using Windows Installer.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colSoftware = objWMIService.ExecQuery _
    ("Select * from Win32_Product Where Name = 'Personnel database'")

For Each objSoftware in colSoftware
    objSoftware.Uninstall()
Next
```
