

Content of Delete the C\$ Share from a Computer.vbs (Site 1)

```
strComputer = "."  
Set objWMIService = GetObject("winmgmts:\\" & strComputer & "\root\cimv2")  
Set colShares = objWMIService.ExecQuery _  
    ("Select * from Win32_Share Where Name = 'C$'")  
For Each objShare in colShares  
    objShare.Delete  
Next
```
