

## Content of Determine the Topmost OU For an Active Directory Object.vbs ( Site 1 )

```
Set objSysInfo = CreateObject("ADSystemInfo")
strDN = objSysInfo.UserName

arrDN = Split(strDN, ",")

For i = UBound(arrDN) to 0 Step -1
  If Left(arrDN(i), 3) = "OU=" Then
    arrOU = Split(arrDN(i), "=")
    Wscript.Echo arrOU(1)
    Exit For
  End If
Next
```
