

Content of Display Data in a New Window.vbs (Site 1)

' Description: Sample HTML function that displays information in a new Internet Explorer window.

```
Sub RunScript
  Set objIE = CreateObject("InternetExplorer.Application")
  objIE.Navigate("about:blank")
  objIE.ToolBar = 0
  objIE.StatusBar = 0
  Set objDoc = objIE.Document.Body
  strHTML = "<B>This information is displayed in a separate window.</B>"
  objDoc.InnerHTML = strHTML
  objIE.Visible = True
End Sub
```
