

## Content of List All Stop Events.vbs ( Site 1 )

' Description: Queries the System event log for any events written due to a stop event (blue screen).

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colLoggedEvents = objWMIService.ExecQuery _
    ("Select * from Win32_NTLogEvent Where Logfile = 'System' _
    & " and SourceName = 'SaveDump'")

For Each objEvent in colLoggedEvents
    Wscript.Echo "Event date: " & objEvent.TimeGenerated
    Wscript.Echo "Description: " & objEvent.Message
Next
```
