

Content of List Antecedent Services for a Single Service.vbs (Site 1)

' Description: Lists all the services that must be running before the SMTP service can be started.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colServiceList = objWMIService.ExecQuery("Associators of " _
    & "{Win32_service.Name=SMTPSVC} Where " _
    & "AssocClass=Win32_DependentService " & "Role=Dependent")

For Each objService in colServiceList
    Wscript.Echo objService.DisplayName
Next
```
