

## Content of List Computer Hardware.vbs ( Site 1 )

' Description: Returns information about the pointing devices installed on a computer. Used as an example of how to retrieve hardware information using WMI.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
& "(impersonationLevel=impersonate)!\\" & strComputer & "\root\cimv2")

Set colMice = objWMIService.ExecQuery _
("Select * from Win32_PointingDevice")

For Each objMouse in colMice
Wscript.Echo "Hardware Type: " & objMouse.HardwareType
Wscript.Echo "Number of Buttons: " & objMouse.NumberOfButtons
Wscript.Echo "Status: " & objMouse.Status
Wscript.Echo "PNP Device ID: " & objMouse.PNPDeviceID
Next
```
