

## Content of List Detailed Summary Information for a File.vbs ( Site 1 )

' Description: Uses the Shell's Application object to retrieve detailed summary information including name, size, owner, and file attributes) for all the files in a folder.

```
Set objShell = CreateObject ("Shell.Application")
Set objFolder = objShell.Namespace ("C:\Scripts")
Set objFSO = CreateObject("Scripting.FileSystemObject")
Dim arrHeaders(13)

For i = 0 to 13
  arrHeaders(i) = objFolder.GetDetailsOf (objFolder.Items, i)
Next

For Each strFileName in objFolder.Items
  For i = 0 to 13
    If i <> 9 then
      Wscript.echo arrHeaders(i) _
        & " " & objFolder.GetDetailsOf (strFileName, i)
    End If
  Next
  Wscript.Echo
Next
```
