

## Content of List SMBIOS Information.vbs ( Site 1 )

' Description: Retrieves part number, serial number, and asset tag number from SMBIOS-compliant computers.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colSMBIOS = objWMIService.ExecQuery _
    ("Select * from Win32_SystemEnclosure")

For Each objSMBIOS in colSMBIOS
    Wscript.Echo "Part Number: " & objSMBIOS.PartNumber
    Wscript.Echo "Serial Number: " & objSMBIOS.SerialNumber
    Wscript.Echo "Asset Tag: " & objSMBIOS.SMBIOSAssetTag
Next
```
