

Content of List Services Running in a Process.vbs (Site 1)

' Description: Returns a list of services running in the Services.exe process.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:" _
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colListOfServices = objWMIService.ExecQuery _
    ("Select * from Win32_Service Where " & _
    "PathName = 'C:\WINDOWS\system32\Services.exe'")

For Each objService in colListOfServices
    Wscript.Echo objService.DisplayName
Next
```
