

Content of List Services that Can be Paused.vbs (Site 1)

' Description: Returns a list of services that can be paused.

```
strComputer = "."  
Set objWMIService = GetObject("winmgmts:"  
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")  
Set colServices = objWMIService.ExecQuery  
    ("Select * from Win32_Service Where AcceptPause = True")  
For Each objService in colServices  
    Wscript.Echo objService.DisplayName  
Next
```
