

## Content of List the Attributes of the Group Class.vbs ( Site 1 )

' Description: Returns a list of mandatory and optional attributes of the group class (as stored in the Active Directory schema).

```
Set objGroupClass = GetObject("LDAP://schema/group")
Set objSchemaClass = GetObject(objGroupClass.Parent)

i = 0
WScript.Echo "Mandatory attributes:"
For Each strAttribute in objGroupClass.MandatoryProperties
    i = i + 1
    WScript.Echo i & vbTab & strAttribute
    Set objAttribute = objSchemaClass.GetObject("Property", strAttribute)
    WScript.Echo " (Syntax: " & objAttribute.Syntax & ")"
    If objAttribute.MultiValued Then
        WScript.Echo " Multivalued"
    Else
        WScript.Echo " Single-valued"
    End If
Next

WScript.Echo vbCrLf & "Optional attributes:"
For Each strAttribute in objGroupClass.OptionalProperties
    i = i + 1
    WScript.Echo i & vbTab & strAttribute
    Set objAttribute = objSchemaClass.GetObject("Property", strAttribute)
    WScript.Echo " (Syntax: " & objAttribute.Syntax & ")"
    If objAttribute.MultiValued Then
        WScript.Echo " Multivalued"
    Else
        WScript.Echo " Single-valued"
    End If
Next
```
