

Content of List the Default WMI Namespace.vbs (Site 1)

' Description: Retrieves and displays the current WMI "Default namespace for scripting" setting.

```
strComputer = "."
```

```
Set objWMIService=GetObject("winmgmts:{impersonationLevel=impersonate}!\\" & _  
strComputer & "\root\cimv2")
```

```
Set colWMISettings = objWMIService.InstancesOf("Win32_WMISetting")
```

```
For Each objWMISetting in colWMISettings  
Wscript.Echo "Default namespace for scripting: " & _  
objWMISetting.ASPScriptDefaultNamespace  
Next
```
