

Content of List the Subfolders of a Folder on the Local Computer.vbs (Site 1)

' Description: Demonstration script that uses the FileSystemObject to return the folder name and size for all the subfolders in a folder. Script must be run on the local computer.

```
Set objFSO = CreateObject("Scripting.FileSystemObject")
Set objFolder = objFSO.GetFolder("C:\FSO")
Set colSubfolders = objFolder.Subfolders

For Each objSubfolder in colSubfolders
    Wscript.Echo objSubfolder.Name, objSubfolder.Size
Next
```
