

Content of Modify Disk Quota Settings.vbs (Site 1)

' Description: Changes the warning threshold and default quota limits for drive C.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colQuotaSettings = objWMIService.ExecQuery _
    ("Select * from Win32_QuotaSetting")

For Each objQuotaSetting in colQuotaSettings
    objQuotaSetting.DefaultLimit = 10000000
    objQuotaSetting.DefaultWarningLimit = 9000000
    objQuotaSetting.Put_
Next
```
