

Content of Modify Folder Attributes.vbs (Site 1)

' Description: Demonstration script that uses the FileSystemObject to check if a folder is hidden and, if it is not, hides it. Script must be run on the local computer.

```
Set objFSO = CreateObject("Scripting.FileSystemObject")
Set objFolder = objFSO.GetFolder("C:\FSO")

If objFolder.Attributes = objFolder.Attributes AND 2 Then
    objFolder.Attributes = objFolder.Attributes XOR 2
End If
```
