

Content of Modify Home Networking Firewall Logging Settings.vbs (Site 1)

' Description: Disables the logging of dropped packets with Internet Connection Firewall. To enable logging of dropped packets, simply set the value of the property LogDroppedPackets to True.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:" & "(impersonationLevel=impersonate)!\\" & strComputer & _
"\root\microsoft\homenet")

Set colItems = objWMIService.ExecQuery _
("Select * from HNet_FirewallLoggingSettings")

For Each objItem in colItems
    objItem.LogDroppedPackets = False
    objItem.Put_
Next
```
