

Content of Modify Service Error Control Codes.vbs (Site 1)

' Description: Configures all auto-start services to issue an alert if the service fails during startup.

```
Const NORMAL_ERROR_CONTROL = 2
```

```
strComputer = "."
```

```
Set objWMIService = GetObject("winmgmts:"  
& "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")
```

```
Set colServiceList = objWMIService.ExecQuery _  
("Select * from Win32_Service where ErrorControl = 'Ignore'")
```

```
For Each objService in colServiceList  
    errReturn = objService.Change( , , NORMAL_ERROR_CONTROL)  
Next
```
