

Content of Modify Service Start Options.vbs (Site 1)

' Description: Disables all services configured as manual start. Among other things, this prevents Power Users from being able to start these services.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\\" & strComputer & "\root\cimv2")

Set colServiceList = objWMIService.ExecQuery
    ("Select * from Win32_Service where StartMode = 'Manual'")

For Each objService in colServiceList
    errReturnCode = objService.Change( , , , "Disabled")
Next
```
