

## Content of Modify System Startup Delay.vbs ( Site 1 )

' Description: Configures a computer to wait 10 seconds (instead of the default 30 seconds) before automatically loading the default operating system upon startup.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colStartupCommands = objWMIService.ExecQuery _
    ("Select * from Win32_ComputerSystem")

For Each objStartupCommand in colStartupCommands
    objStartupCommand.SystemStartupDelay = 10
objStartupCommand.Put_
Next
```
