

Content of Modify Terminal Services Windows Authentication Setting.vbs (Site 1)

' Description: Configures Terminal Services to use standard Windows authentication. To disable standard authentication (in order to use a custom authentication package), set the value of the WindowsAuthentication

```
Const STANDARD_AUTHENTICATION = 1
```

```
strComputer = "."
```

```
Set objWMIService = GetObject("winmgmts:"  
& "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")
```

```
Set colltems = objWMIService.ExecQuery("Select * from Win32_TSGeneralSetting")
```

```
For Each objItem in colltems
```

```
objItem.WindowsAuthentication = STANDARD_AUTHENTICATION
```

```
objItem.Put_
```

```
Next
```
