

Content of Modify a Custom Document Property.vbs (Site 1)

' Description: Modifies a custom property (TestProperty, setting the new value to "New value") found in the summary information properties for a document named C:\Scripts\Test.doc.

```
Set objPropertyReader = CreateObject("DSOleFile.PropertyReader")
Set objDocument = objPropertyReader.GetDocumentProperties _
("C:\Scripts\Test.doc")

Set colCustomProperties = objDocument.CustomProperties
For Each strProperty in colCustomProperties
  If strProperty.Name = "TestProperty" Then
    strProperty.Value = "New value"
  End If
Next
```
