

## Content of Modify the Default WMI Namespace.vbs ( Site 1 )

' Description: Sets the WMI "Default namespace for scripting" setting to "root\cimv2".

```
strComputer = "."
```

```
Set objWMIService=GetObject("winmgmts:{impersonationLevel=impersonate}!\\" & _  
strComputer & "\root\cimv2")
```

```
Set colWMISettings = objWMIService.InstancesOf("Win32_WMISetting")
```

```
For Each objWMISetting in colWMISettings  
objWMISetting.ASPScriptDefaultNamespace = "root\cimv2"  
objWMISetting.Put_  
Next
```
