

Content of Monitor Active Directory Database Performance.vbs (Site 1)

' Description: Uses cooked performance counters to monitor the performance of the Active Directory database on a domain controller.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colDatabases = objWMIService.ExecQuery _
    ("Select * from Win32_PerfFormattedData_Esent_Database " _
    & "Where Name = 'NT Directory'")

For Each objADDatabase in colDatabases
    Wscript.Echo "Database cache hit percent: " & _
        objADDatabase.DatabaseCachePercentHit
Next
```
