

Content of Move a User Account to a New Domain.vbs (Site 1)

' Description: Uses the MoveHere method to move a user account to another domain. Note that there are a number of restrictions associated with performing this type of move operation.

```
Set objOU = GetObject("LDAP://ou=management,dc=na,dc=fabrikam,dc=com")
```

```
objOU.MoveHere _  
    "LDAP://cn=AckermanPilar,OU=management,dc=fabrikam,dc=com", vbNullString
```
