

Content of Pause Services Running Under a Specific Account.vbs (Site 1)

' Description: Pauses all services running under the hypothetical service account Netsvc.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colServices = objWMIService.ExecQuery
    ("Select * from Win32_Service Where StartName = '.\netsvc'")

For each objService in colServices
    errReturnCode = objService.PauseService()
Next
```
