

Content of Populate a Listbox Using the Contents of a Text File.vbs (Site 1)

' Description: Sample HTML function that opens a text file and adds the contents to a listbox each time a Web page or HTA is loaded.

```
Sub Window_Onload
  ForReading = 1
  strNewFile = "computers.txt"
  Set objFSO = CreateObject("Scripting.FileSystemObject")
  Set objFile = objFSO.OpenTextFile _
    (strNewFile, ForReading)
  Do Until objFile.AtEndOfStream
    strLine = objFile.ReadLine
    Set objOption = Document.createElement("OPTION")
    objOption.Text = strLine
    objOption.Value = strLine
    AvailableComputers.Add(objOption)
  Loop
  objFile.Close
End Sub
```
