

Content of Prevent AutoChk From Running.vbs (Site 1)

' Description: Ensures that Autochk.exe will not run against drive C the next time the computer reboots, even if the "dirty bit" has been set on drive C.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\\" & strComputer & "\root\cimv2")
Set objDisk = objWMIService.Get("Win32_LogicalDisk")
errReturn = objDisk.ExcludeFromAutoChk(Array("C:"))
```
