Content of Read a Text File from the Bottom Up.vbs (Site 1)

' Description: Demonstration script that uses the FileSystemObject to read a text file, and then displays the text file in inverse order (that is, beginning with the last line in the text file and ending with the first line).

```
Dim arrFileLines()
i = 0

Set objFSO = CreateObject("Scripting.FileSystemObject")
Set objFile = objFSO.OpenTextFile("C:\FSO\ScriptLog.txt", 1)

Do Until objFile.AtEndOfStream
    Redim Preserve arrFileLines(i)
    arrFileLines(i) = objFile.ReadLine
    i = i + 1
Loop

objFile.Close

For l = Ubound(arrFileLines) to LBound(arrFileLines) Step -1
    Wscript.Echo arrFileLines(l)
Next
```

```
Dim arrFileLines()
i = 0

Set objFSO = CreateObject("Scripting.FileSystemObject")
Set objFile = objFSO.OpenTextFile("C:\FSO\ScriptLog.txt", 1)

Do Until objFile.AtEndOfStream
    Redim Preserve arrFileLines(i)
    arrFileLines(i) = objFile.ReadLine
    i = i + 1
Loop

objFile.Close

For l = Ubound(arrFileLines) to LBound(arrFileLines) Step -1
```
