

Content of Rename a Folder.vbs (Site 1)

' Description: Renames the folder C:\Scripts to C:\Repository.

```
strComputer = "."
Set objWMIService = GetObject("winmgmts:"
    & "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")

Set colFolders = objWMIService.ExecQuery _
    ("Select * from Win32_Directory where name = 'c:\Scripts'")

For Each objFolder in colFolders
    errResults = objFolder.Rename("C:\Script Repository")
Next
```
