

Content of Rename a Local Area Connection.vbs (Site 1)

```
Const NETWORK_CONNECTIONS = &H31&
Set objShell = CreateObject("Shell.Application")
Set objFolder = objShell.Namespace(NETWORK_CONNECTIONS)
Set collItems = objFolder.Items
For Each objItem in collItems
    If objItem.Name = "Local Area Connection 2" Then
        objItem.Name = "Home Office Connection"
    End If
Next
```
