

## Content of Require a Local User to Change His or Her Password.vbs ( Site 1 )

' Description: Binds to a local user account on the computer named atl-win2k-01, and configures the account so that the user (kenmyer) must change his password the next time he logs on.

```
strComputer = "atl-win2k-01"  
Set objUser = GetObject("WinNT://" & strComputer & "/kenmyer")  
objUser.Put "PasswordExpired", 1  
objUser.SetInfo
```
