

## Content of Resume All Paused Printers.vbs ( Site 1 )

' Description: Resumes all the paused printers on a print server.

```
Const PRINTER_IS_PAUSED = 8
```

```
strComputer = "."
```

```
Set objWMIService = GetObject("winmgmts:"  
& "(impersonationLevel=impersonate)!\" & strComputer & "\root\cimv2")
```

```
Set colInstalledPrinters = objWMIService.ExecQuery _  
("Select * from Win32_Printer where ExtendedPrinterStatus = 8")
```

```
For Each objPrinter in colInstalledPrinters  
  ObjPrinter.Resume()  
Next
```
